PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience developing full-stack applications using Python, Flask, MySQL, and JavaScript. Skilled in RESTful API development, relational database design, secure authentication, and AI/LLM API integration. Built end-to-end applications featuring role-based access, analytics dashboards, and data processing, with a strong foundation in backend development and problem-solving.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, OOPs, HTML5, CSS3.
Backend & Databases: Flask, SQLAlchemy, MySQL, RESTful APIs.
AI & Advanced Tech: Groq API (LLaMA 3), Gemini AI API, Prompt Engineering.
Tools & Frameworks: Git, GitHub, Postman, VS Code, Power BI.

PROFESSIONAL EXPERIENCE

Skillbanc Virtual Internship
Software Engineering Intern January 2025 – June 2025

- Gained introductory exposure to Android application development using Flutter and Android Studio through structured guided projects.
- Explored Firebase Authentication and Realtime Database integration for user management and data storage as part of team-based learning.
- Collaborated with a cross-functional team to review code, share feedback, and understand end-to-end mobile development workflows.

TECHNICAL PROJECTS

AI Resume Screening System May 2026
Python, Flask, MySQL, Groq API (LLaMA 3), Tailwind CSS [GitHub]

- Developed an AI-powered Applicant Tracking System using Flask, MySQL, and Groq LLaMA 3 capable of analyzing up to 30 resumes in a single batch upload.
- Implemented a dual-scoring engine evaluating candidates across 5 key dimensions including skills, education, and experience.
- Built secure authentication with 2FA, PDF resume parsing, analytics dashboards, and CSV export functionality.

FlaskCart – Full-Stack E-Commerce Web Application January 2026
Python, Flask, MySQL, HTML5, CSS3, JavaScript [GitHub]

- Built a full-stack e-commerce platform with 7 relational database tables and 20+ Flask routes covering product listing, cart management, and order placement.
- Implemented dual-portal system with a user-facing storefront (browse, cart, checkout) and an admin dashboard (product CRUD, multi-image upload, order stats).
- Integrated auto-generated product IDs, stock-aware cart validation, and session-based authentication with secure login for both user and admin roles.

Attendance Tracking Management System May 2024
Python, MySQL, HTML, CSS, JavaScript [GitHub]

- Developed a role-based attendance management platform supporting 3 user portals: Admin, Teacher, and Student.
- Implemented 10+ core modules including attendance tracking, class management, reporting, and CSV exports.
- Built secure authentication and access controls using password hashing, CSRF protection, and session management.

EDUCATION

ICFAI University Hyderabad, Telangana
Bachelor of Technology in Computer Science and Engineering June 2021 – July 2025

CERTIFICATIONS

- **Python Full Stack Development** – Codegnan IT Solutions (Completion Certificate, June 2026).
- **TCS iON Career Edge – Young Professional** – TCS iON Digital Learning Hub.
- **Software Engineering Job Simulation (Electronic Arts)** – Forage Platform.
- **Data Visualization: Empowering Business with Effective Insights** – Tata Group (Forage).
